

# Tips to Help You Reduce Your Risk of Mosquito Infestations

Our expert pest management technicians recommend these handy tips to help reduce your risk of mosquito infestations.

- ✔ Keep gutters clear of debris to avoid stagnant water to reduce mosquito breeding grounds.
- ✔ Fill in areas of the yard where water pools or holes in trees that catch water
- ✔ Keep the property free of water-holding containers or make sure that they are covered
- ✔ Keep rubbish bins closed or covered
- ✔ Change the water in birdbaths, wading pools and pet dishes several times a week
- ✔ Turn over wading pools and wheelbarrows when not in use
- ✔ Keep swimming pools, hot tubs and outdoor saunas clean and chlorinated
