

# Tips to Help You Reduce Your Risk of Spider Infestations

Our expert pest management technicians recommend these handy tips to help reduce your risk of spider infestations.

- ✓ Seal up all cracks and crevices around your property
- ✓ Keep the foliage around your property well-trimmed and off the property walls
- ✓ Keep your property as free of clutter and stored goods as much as is reasonably practical
- ✓ Remove any spider webs that you find
- ✓ Keep your property well ventilated and free of excess moisture
- ✓ Spray or vacuum up any spiders that you find

If you think someone may have been bitten by a poisonous spider, don't wait for symptoms to occur, call the Poisons Information Centre on 13 11 26 for first aid advice.

If the person has collapsed or is not breathing, call Triple Zero (000) and ask for an ambulance.

Where possible try to identify the spider, taking a photo can help with this, else write down any distinguishing features and markings that you can see. Do not try to capture the spider unless safe to do so.
