

Tips to Help You Reduce Your Risk of Termite Infestation

Our expert pest management technicians recommend these handy tips to help reduce your risk of termite infestation.

- ✔ Find and repair any water leaks in & around your property
- ✔ Direct runoff from hot water systems & air conditioners away from the property
- ✔ Ensure that any subfloors have good access, cross-floor ventilation & drainage
- ✔ Store firewood & building materials away from your property
- ✔ Remove any dead trees, fallen branches, old wood & stumps from your property
- ✔ Keep your weep holes clear & visible
- ✔ Keep the external edge of your concrete slab clear & visible
- ✔ Only use treated timbers for garden beds or retaining walls
- ✔ Check your foundations for cracks and other termite entry points and repair where necessary
- ✔ Have your property regularly inspected for termites
